DATE: **OCT 18 1994**  
 SUBJECT: L.E. Carpenter Site (Dayco Corporation)  
 Cultural Resources Survey/RA Workplan  
 FROM: John Filippelli, Chief  
 Environmental Analysis Section  
 TO: Janet Feldstein, Chief  
 Central New Jersey Section II

*Jane*

*John Filippelli*

We have reviewed the draft Remedial Action Workplan for the L.E. Carpenter site to determine whether the excavations proposed in the remedial workplan will affect those areas of the site that are considered sensitive for the discovery of cultural resources.

Our analysis of the workplan indicates that three of the organic "hotspots" (1, 2, and 6) will require additional cultural resources work, since the excavations at these spots will intrude into subsurface soil zones that are considered sensitive. (The critical depth for hotspots 1 and 2 is two feet; for hotspot 6, it is five feet). Accordingly, we recommend that an archaeological consultant be present to monitor the excavations at the specified hotspots, from the time the critical depth is reached till the end of the excavation.

In order to define the specific tasks to be performed by the archaeological consultant during the monitoring phase, we would suggest that a meeting or a conference call be arranged between the archaeologist, RPM, appropriate remedial design personnel, and EIB staff.

If you have any questions regarding our comments, or to arrange a meeting or conference call, please have the RPM call Raymond P. Reyes at x6719, or John Vetter, our archaeological expert, at x6713.
